

Short CURRICULUM VITAE

of

Dr. Miltiadis Athanasiou

I hold a B.Sc. degree in Environmental Science from the University of the Aegean, Lesvos, Greece, and a M.Sc. Degree in Prevention and Management of Natural Disasters from the National and Kapodistrian University of Athens (NKUA). I also hold a Ph.D. in wildfire management from the same University and I have received the International Association of Wildland Fire (IAWF) Doctoral Student Scholarship for 2014.

I have built significant experience in forest fire management and I am working as Research Affiliate with the Institute of Mediterranean Forest Ecosystems in Athens, Greece.

My work includes documentation of wildfire behaviour and firefighting in the field, followed by behaviour analysis in the office using GIS, and analysis of safety considerations, especially for extreme fires. Regarding safety I have reconstructed and analyzed many past firefighting accidents that have taken place in Greece and published the lessons learned. Fuel measurement and modelling, fire risk assessment and prediction and firefighting effectiveness are additional fields I work on.

In parallel with my research activities, I train professional and volunteer firefighters on wildfire behaviour, hazards, human factors, safety and health on the fire line, and forest firefighting tactics, I develop and conduct full-scale wildfire drills with first responders and teach citizens how to prepare their houses and protect themselves. One recent example is my participation in a team of international and Greek fire experts who, in April 2019, delivered a week-long high-level course on extreme fire behavior, Wildland Urban Interface fire dynamics and impact, as well as firefighter safety at the Hellenic Fire Academy in Kifissia, Athens, Greece. The trainees were 25 selected officers of the Hellenic Fire Corps.

I have also taught the "Topography and Geoinformatics in Disaster Relief and Rescue Operations" Course, in the Hellenic Fire Academy and the "Wildfires management" Courses in two postgraduate programs at the NKUA.

My firefighting training and operational experience commenced in 2000, when I started being trained by the Special Units of Disaster Response, Hellenic Fire Corps while I was the Lead Supervisor and Operational Coordinator, of a Natural Disaster Response and Relief Volunteer Team. I have also served with the 6th Fire Department Station of Athens as a Volunteer Firefighter (fire engine crew member). Since 2008, I am officially recognized as Specialized Volunteer Expert by the Hellenic General Secretariat of Civil Protection and I have also worked in aerial firefighting, as crew member of heavy-lift (Type I) helicopters in Greece, for five fire seasons.

I try to promote the use of fire in fire prevention and suppression in Greece, which for the time is not legally recognized.
